

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
Applied Solutions - projects designed to use online technology to provide solutions to everyday problems				
VMOL - Visual Manufacturing Online	Project sought to test, trial and demonstrate online intranet/internet technology in an actual product design or product refinement process	QMI - Queensland Manufacturing Institute	Industrial machinery & equipment manufacturing	1
ABCD - Australian Building and Construction Database	Project sought to establish the benefits for the architecture, engineering and construction industry of linking an existing online multimedia network to an actual construction site; To establish benchmarks and review the costs of benefits of e- data exchange	Insearch Ltd - University of Technology Sydney	Building & Construction	1
ACTEW Mobile Maps Project	Project developed an information system, called ACTEW Mobile Maps, designed to improve operational efficiency and service delivery of all utilities and local government authorities	CSIRO Mathematical & Information Sciences	Utilities	1
VADO - Visual Applications and Diagnostics Online	Project sought to promote and assist Australian companies in exploring the benefits of using online technologies in maintenance, equipment monitoring and support; Project includes a comprehensive range of initiatives to help SMEs & larger companies understand the technical aspects of incorporating Internet based video & data communication technologies into their products, services & corporate operations	IRIS - Industrial Research Institute Swinburne, Swinburne University of Technology	Industrial machinery & equipment manufacturing	2

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
AEDOL - Australia Earth Data online	Prototype system developed and used to demonstrate the capabilities of advanced technology computer based facility in acquiring, harmonizing and interpreting spatial data & satellite imagery for assessing natural resources concerns	Technik P/L	Spatial Industry	2
Livestock Exchange Online	Sought to establish an Internet Auction Platform for the sale of cattle	VLE - Victorian Livestock Exchange	Livestock Farming	4
E-Com Adviser	Project developed a web-delivered advisory package to help SMEs identify and explain commercial and legal issues regarding e-commerce; Also developed an Intranet package that provides a roadmap and check list for setting up an e-commerce facility, from conceptual stage to the conduct of business online	Gilbert & Tobin	Legal & Accounting	4
Online Livestock Exchange	Project sought to establish and implement an electronic livestock marketing system that can operate in conjunction with the current physical auction system, enabling accurate animal assessment and linkage with all member livestock exchanges throughout Australia.	SAO - Saleyard Operators Association of NSW Inc.	Livestock farming	5
SA Local Govt Procurement Project	Project will roll out a whole of local government e-procurement solution for South Australian councils and their suppliers, to demonstrate the potential for savings and efficiencies for both buyers and suppliers.	CPC - Council Purchasing Co-operative Limited	Government	5
Data Warehouse - Projects that will make industry information easier to access for businesses and				

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
W-BISS - Web Based Industry Support Service	Project sought to develop a full-search web based industry capability database	Warren Centre for Advanced Engineering	Multi-Industry	1
Regulation Analysis Service	Using the meat industry as a pilot, the project sought to develop an electronic system for analyzing legislative/regulatory impacts on food businesses	Rural Action P/L	Food	1
COPE - Continuing Online Professional Education	Project trialed the development and delivery of accounting modules via the Internet as a more flexible and cost effective way to meet the educational needs of accountants	Access Australia CMC P/L	Legal & Accounting	2
Australian Tourism Data Warehouse	Project established a central storage facility for tourism products and destination information from all Australian States and Territories	Australian Tourist Commission	Hospitality & Tourism	4
Beef Industry Website	Website developed provides an independent listing facility for bulls & semen for sale, allows use of the 'BreedObject' technology to describe and rank bulls for profitability and provides access to industry genetic evaluation details for each bull	AGBU - Animal Genetics and Breeding Unit; joint institute of UNE & NSW Agriculture	Livestock Farming	4
Industry Network - Projects designed to establish extranets for a specific industry or sector				
Screen Industries Online	Sought to develop new business data mgt. systems integrated with Internet and intranet technologies to deliver membership services, public information, commercial transactions, industry business-to-business networking, government & agency liaison	AFC - Australian Film Commission	Media	2

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
AANX - Australian Automotive Network eXchange	Project was designed to advance the use of e-commerce within the automotive industry through the establishment of an automotive Intranet system that would provide secure and guaranteed transmission of all types of data between participating members	FCAI - Federal Chamber of Automotive Industries	Automotive	3
Flornet - Australian Floral Industry online Network	Project designed to provide an online communications system to the three strata of the floral industry	Petals Network	Flower	3
WIN - The Wine Industry Network	Project sought to establish a portal to support the needs of the wine industry	BIG - Barossa Infrastructure Group	Wine & Liquor	3
RailHub - Trains on the Internet	Railhub enabled rail carriers and their customers, as well as other contractors (e.g. marine terminals, consolidators, container storage yards) to exchange information about equipment and cargo in a managed environment using the Internet	Tradegate ECA	Rail	3
Anglicare Australia National IT Network	Pilot project tested new approaches to the national contracting of services through the use of the Internet to enable national programming and service development	Anglicare Australia	Welfare	4
Ipswich Business Online	Project will connect clusters or business groups through e-commerce	Ipswich City Council	Multi-industry	4
Community Sector Online	Project will provide a flexible technology framework as a shared resource to members of the community welfare sector; project will make available a suite of shared & off-the-peg websites with built-in functionality	ACOSS - Australian Council of Social Service	Welfare	4

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
Aged Care Online	Project established a gateway (<www.agedcareonline.com>) which care providers can use as an economical way of accessing a variety of software applications for the management of aged care facilities.	eGlobal Pacific	Aged care	5
Portal - projects designed to encourage an industry or a region to move online by providing a facility for				
Tasmanian Design and Development Company Retail Web Site	Project sought to build a web presence to showcase the work of about 160 artists, designers, artisans and crafts people who make products for sale via the portal.	Roar Three	Arts	2
COOP - Community Owned and Operated Portals Initiative	Project sought to develop and pilot test a model for the rapid adoption of e-commerce by SMEs in Australia.	ETC - Electronic Trading Concepts	Multi-industry	3
Albany Gateway	Project developed a regional portal for Albany and its surrounding regions.	Edith Cowan University; project now under Albany GateWAY Cooperative	Multi-industry	3
Building and Construction online	Project sought to accelerate online services in the building and construction industry by providing online services and the roll-out of hardware/software.	HIA - Housing Industry Association Ltd	Building & Construction	3
My South West	Portal has been designed to market the South West region of Western Australia	Bunbury Chamber of Commerce and Industry	Multi-industry	4

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
Commercial Road Transport Industry Portal	Portal will provide a single entry point for the Industry and will encourage uptake of e-commerce and the associated use of common standards and open technologies	Adacel Technologies Ltd	Transport	4
Yamba Online	Project was designed to develop a Website for businesses in Yamba area and to establish a local value added ISP to provide local businesses with access to a range of online services; <www.yambansw.com.au>	Yamba District Chamber of Commerce	Multi-industry	4
Commercial Furniture Industry Portal	Project will create a portal for the Commercial Furniture Industry Association of Australia Ltd (CFIAA); <www.commercialfurniture.net>	Tecknowlogy P/L	Furniture	4
Water Industry Alliance Portal	Portal has been developed to promote clustering between SMEs involved in the commercial development of South Australia's water industry. This is being used to rapidly disseminate vital project opportunities to members and to host 'virtual meetings' to facilitate timely response to extremely short lead times.	WIA - Water Industry Alliance, Inc.	Water	4
TTE - Thoroughbred Transaction Exchange	Project will establish a portal to create a focal point for the thoroughbred industry to cooperate and share information on breeding and racing data	Badranad P/L	Sport & Recreation	4
E-Retailing & Distribution for Regional Supermarkets	Project is designed to establish a retail community portal that is expected to enhance operations and improve information flow along the supply chain.	United Star Supermarkets Ltd.	Food	5

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
KAOL - KU Arts Online	The project is designed to benefit the indigenous Australians and their art and craft centres in northwest South Australia by unifying stock control and improving retail management.	Pitjantjatjara Yankuytjatjara (PY) Media Aboriginal Corporation	Arts	5
Cootamundra	A portal will be established to create an online presence and develop the e-commerce capability of businesses in the Cootamundra district. This is expected to create opportunities for economic growth in the region through alliances, shared services and collaborative industry development.	Cootamundra Devt Corporation Ltd (CDC)	Multi-industry	5
Flinders Ranges Online Reservations System	Project will assist tourism accommodation providers in this remote region by providing an online reservation systems.	NRDB - Northern Region Development Board	Hospitality & Tourism	5
I-Build: Skilling the Construction Industry for E-commerce	A single entry point will be established for the building industry that can provide access to general industry information, tender listings, online training courses, and project and document management applications.	MBA - Master Builders Association	Building & Construction	5
Delivering Export Business Facilitation Through E-Collaboration	The project sought to develop a B2B online solution to enhance the export competitiveness of the spatial information industry by facilitating web collaboration between SME members of the industry cluster.	The South Australian Spatial Information Industry Cluster Incorporated	Spatial Industry	5

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
Dubbo City Online E-commerce Site	The project sought to enhance the already existing portal (<www.dubbo.com.au>) by adding e-commerce capabilities expected to benefit some 1800 local businesses.	Dubbo City Development Corporation Ltd	Multi-industry	5
Supply Chain Management - Projects designed to improve the flow of products and services from producer				
PECC - Procurement Electronic Commerce & Communication - Healthcare (2nd phase)	Sought to introduce e-commerce into the pharmaceutical supply chain, initially working with 6 wholesalers and 700 suppliers	DIST	Health	2
Food and Beverage Procurement Project	Online procurement project using established software for ordering and logistics in the Tasmanian Food and Beverage Sector	TECC - Tasmanian Electronic Commerce Centre	Food	3
Virtual Supply Chain Management for the Franchise Industry	Sought to encourage the early and easy adoption of electronic commerce with a low cost generic e-commerce supply chain management solution applicable to and scalable for the franchise sector	Intranet Australia	Franchise	3
Newsagency Industry Electronic Commerce Group	To establish an e-commerce infrastructure for newsagents and their suppliers nationwide that would enable them to provide banking, insurance, bill paying and other services	ANF - Australian Newsagents Federation	Office & Paper Products	3

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
MIPP - Multi Industry Procurement Project	Use of industry-proven software for ordering, inventory control and logistics fulfillment in the mining and associated industries	TECC - Tasmania Electronic Commerce Centre P/L	Multi-industry	3
Tasmania Online Logistics	Project established an online logistics system for Tasmania which will allow all Tasmanian businesses to get quotes, make bookings, track consignments and make payments online	TECC - Tasmania Electronic Commerce Centre P/L	Transport	4
Transport Hub - Electronic Messaging Service	Project will deliver 'open' trading community services, using the Internet to allow SMEs to exchange purchase orders & acknowledgements, freight bookings and proof of deliveries over the Internet; expected to reduce costs for the transport industry and increase their efficiency; Transport Hub will integrate automated freight bookings within the procurement process	CSC Australia	Transport	4
OPEN - Office Products E-commerce Network	Sought to deliver a B2B e-commerce solution for the office products industry that is affordable and accessible by bona fide industry members	PeCC	Office & Paper Products	4
Market Boomer (Hospitality Online Trading Community)	Project sought to establish an online trading community for members of the Queensland Hotels Association and their suppliers using the "marketboomer" technology	Simple Purchasing Network P/L	Hospitality & Tourism	4

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
Remote Business Australia	Project will develop a marketplace to address the supply chain needs of SMEs in Alice Springs and Central Australia, thereby allowing these businesses to benefit from supply chain efficiencies and from increased work opportunities in the area.	Remote Australia P/L	Multi-industry	5
Conception to Consumption: Facilitating the Food Production Value Chain Through online Technology	Project will implement e-commerce technologies to offer primary beef producers and small retailers opportunities to create value chains to efficiently manage the process of beef production.	Crossakiel P/L	Food	5
Creating More Time to Promote and Sell Books	Project has enabled booksellers to trade electronically with key suppliers using a common inventory management system and through the establishment of standards for information exchange in the publishing industry.	Business to Business.com P/L (trading as Pacstream)	Printing & Publishing	5
Security Solutions - Projects designed to develop technologies to address security concerns over the use of				
Australian Information Security Demonstration Site	Developed a demonstration and awareness site on IT&T security	Australian IT&T Security Forum	IT	2
Medi-Safe Communication (Secure Email Pilot Program)	Piloted the use of secure online technologies within the Gold Coast's health sector	The Competitive Option	Health	3

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
E-Safe Communications	Sought to link GPs & specialists to hospitals and community health services via a secure email and communications technology	TCO - The Competitive Option	Health	4
Global Secure Messaging (formerly Online Document Exchange)	Project has trialed the online DX system, which allows organizations to securely exchange electronic documents, based on public infrastructure in state government agencies, a law court and five law offices	Global Secure Messaging P/L	Legal & Accounting	4
Australian Electronic Trading Network	Project will establish a portal for national and international trade, in which all users have been authenticated via a rigid 100 point check	Ai Group - Australian Industry Group	Multi-industry	4
Patient Centred Data Using Smart Cards	Pilot project integrates Internet, public key and smart card technologies to provide a portable, private and secure method for sharing patient health data among health care providers; <www.smartcard.com.au>	Smart Card Applications	Health	4
Standards Setting - project primarily designed to establish common standards for a particular industry or				
Super EC Programme	Project created the standards, relationships & processes for the automated exchange of superannuation information across all industry stakeholders; <www.superec.org.au>	Super EC Council	Finance & Insurance	4
EBOM - Electronic Business Oriented Method	Project will define an engineering approach for the development of cross-sector EC message standards	BT Financial Group	Multi-industry	5

Appendix A: Description of ITOL Projects funded in Rounds 1-5 (grouped by Project type)

Name	Description / Objectives	Principal Grant Recipient	Industry Focus	Funding Round
E-Hub: The Electrical & Data Cabling Industry EC initiative	Project developed open standards for the electrical and cabling industry which delivered uniformity across trading documents and electronic catalogues for the industry.	Universal Exchange Services P/L	Building & Construction	5
simpleTEN: TCF - B2B Hub	Project established a facility for providing b2b e-commerce services to the textile, clothing & footwear market towards the adoption of standards in the industry for messaging and product identification.	Telstra Corporation Limited	Clothing & Footwear	5
Others - Training or research on e-commerce				
Electronic Commerce for SME Exporters	Feasibility study was conducted to determine the barriers faced by SME exporters in using e-commerce to effectively administer their export activities	Victoria's Golden Region, Inc.	Multi-industry	2
