Subject: Re: Request for submissions on regulatory issues

To whom it may concern,

I could try to explain my views and opinions on this issue, but instead Mr Simon Hackett has said it much better than I ever could.

Please see his speech here:
<http://www.veoh.com/videos/v10201149JrtHghqd>

And the Presentation can be downloaded from here:
http://web.mac.com/simon_hackett/Site/Technology/Entries/2008/4/15_An_Inconvenient_Truth_about_FTTN.html

My main concern is that the company that builds and runs a national network, MUST NOT also be able to sell it retail. This is the current situation we are in with Telstra/Bigpond which encourages anti-competitive behaviour which in the end just hurts competition and innovation.

Regards,
Andrew Dean
